#### **Credit ratings**

The government has solicited credit ratings from two credit rating agencies: S&P Global Ratings and Fitch Ratings.

For long-term debt, they are AA+ and AA+ (stable, stable)

## **Finnish economy**

### The impact of the Russian invasion of Ukraine on the Finnish economy is difficult to predict

**Baseline scenario** (*April 2022*) by the Ministry of Finance assumes limited duration of the war.

- Finland's economic growth will slow this year, but not stop or go into recession. Sanctions against Russia will slow growth to 1.5% in 2022.
- The sanctions have increased energy, oil, gas and electricity prices, however the price pressures are expected to ease.
- Consumer price inflation is expected to reach 4% in 2022.
- Exports to Russia account for around 4.5% of total exports. Interruption of all export to Russia would cut 1-1.5% of the Finnish GDP.

**Risk scenario** (*April 2022*) by the Ministry of Finance assumes prolonged war and expanded sanctions.

- The scenario assumes a complete discontinuation of trade in energy commodities with Russia. The lost energy supply would be replaced by energy sourced from elsewhere or by other forms of energy.
- Escalation of sanctions or the war would lead to larger effects on the Finnish economy and public finances.
- The GDP growth in this scenario would be 0.5% in 2022.

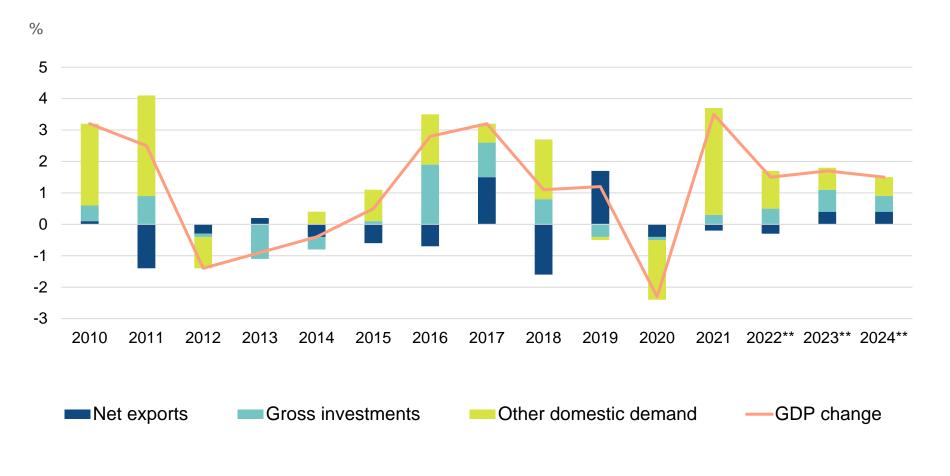

## Output growth will not slow below potential output in Finland this year

- Exports to Russia are projected to contract significantly. The drop in exports mainly relates to goods, whereas service exports will remain strong.
- Due to uncertainty, investment growth is slowing, but housing starts remain at high level.
- The employment rate is very high.
- General government deficit continues to improve in 2022-2024.

## **Sustainability in Finland: current themes**

- Finland ranks high in many comparisons and is by many metrics a global forerunner in sustainability
- Finland ranks #1 in the UN Sustainable Development Goals country ranking 2021
- The Government's climate neutrality goal is 2035 but current measures are not sufficient, therefore:
  - New Medium-term Climate Change Policy Plan 2022
  - Update of the Energy and Climate Strategy in 2022
- The Health and Social services reform 2023
- Tackling the COVID-19 aftermath

#### Finland

#5<sup>th</sup> least vulnerable country in the world to the negative impact of climate change

#5<sup>th</sup> most ready country to adopt to climate change.
